Tammie,

Yes, I will have Stephen provide that information when he gets back to the office next week. CAS

Carlos

Could you provide ADEQ with a schedule for targeting completion of the dioxin reassessment? Thanks
Tammie

Dianna,

We agree that the revised ICs need to be finalize as soon as possible.
We believe that the site can be reuse/redeveloped as long as the ICs are followed.
The site does not need to be deleted (partial) for the site to be use for industrial purposes. We agree to move forward with the partial deletion as soon as we have information from the Dixon reassessment. CAS

Subject: Arkwood site- Omaha Arkansas

Dear Stephen:

I am sending this e-mail regarding the Arkwood site in Omaha, Arkansas with one update and one request. ADEQ is working on a response to the Congressman's questions and should have it to you by Monday as requested.

My request concerns the revised deed notice that ADEQ commented on a month ago. On our conference call prior to the Grisham meeting, Ms. Moran said that she had incorporated some of the ADEQ changes and we would see the deed notice again before it went to Bud Grisham. ADEQ is concerned with the delays in getting the notice drafted. We understand it may be revised based on the dioxin re-evaluation, but the Grisham's should be apprised of the current state of the notice as soon as possible.

ADEQ is of the opinion that with an adequate deed notice and restrictions in place a partial deletion of the site may be possible. My management would like the deed notice finalized by the end of this month and the process of a partial deletion moving forward by the end of this year.

ADEQ is committed to working with EPA in this process to clean up the Arkwood site and put the property into beneficial use while protecting human health and the environment. Please call or e-mail me with any questions or concerns. I look forward to hearing from you soon regarding the Arkwood site.

Sincerely,
Dianna Kilburn
